JARVIS

The Jarvis Sow Bung System Model VC - for the cutting out of sow bungs.

- Quickly and efficiently cuts out sow bungs.
- Fast - a single operator can bung up to 1200 sows / hour.
- Easy to use, skilled labor is not required.
- More powerful than the hog bung tool; extra power for the larger blades required on sows.
- Increased yields - optimal blade size leaves more meat on the carcass, less on the intestine.
- Higher grade casings - less casing damage than with a knife.
- Hardened and ground solid stainless steel blades for long life.
